 * Selected car model

Air Sterilizer Service

Have I done car interior air sterilization?
 I think it's time to do! Do not let bacteria breed in my car!

\$20 only
15min job !!
 exclude waiting time

*Recommended Every 2 to 3 months

- * Removing unpleasant odour and viruses from internal cabin of car
- * Effective in getting rid of unpleasant smell from smoke and organic material.
- * Effective in killing bacteria and viruses that cause infection, mould and germs.

* Powered by **cerafusion™ Technology**, the latest ion and ozone technology. Unlike traditional air cleaning devices which rely on filters to clean the air, the AS100 generates massive amount of **negative ions** and time-controlled levels of ozone to clean the air. Negative ions and ozone are nature's way of cleaning the air. Negative ions are found to be beneficial to human health whereas ozone is very effective in killing bacteria, viruses and removing unpleasant odors.

PIT Service : Car Repair

*Timing System / Engine Parts
 *Brake Pad / Rotor Disc / Brake Pump
 *Drive Shaft (CV Joint) / Gear Box (AT and MT)
 *Shock Absorber / Undercarriage Repair

Air Con Repair

*Air Con Compressor / Air Con Fan Motor
 *Air Con Coil Cleaning / Air Con Service
 *Pipeline leaking / Top Up Gas R134

PIT SERVICE Automatic Transmission Fluid (ATF) Replacement

Recommended interval
 Every 30,000km

From \$100
 30mins

Regular replacement is important to prevent:
 > Reduced power and acceleration
 > Reduced gas mileage
 > Increased shift shock

Note:
 We may occasionally be unable to replace the ATF depend on the vehicle model, the specified ATF type, the condition of the vehicle transmission.

PIT SERVICE Engine Flushing

Recommended interval
 Every 20,000km

\$80
 20mins

Advantages:
 > Remove sludge deposits and enhanced performance
 Our engine flush system uses a patented solvent to wash sludge and other dirt right out of the engine. As a result, the engine can extract maximum lubricating performance from the engine oil.

PIT SERVICE SOD-1 Engine Oil Treatment

Recommended interval
 Every 20,000km

\$68
 400ml

Advantages:
 > Reduce engine noise
 > Recover engine power and better engine combustion.
 after use it, the engine will more cleaner.

(Imported from Japan)

PIT SERVICE Coolant Replacement

Recommended interval
 Every 20,000km

From \$35
 15mins

Advantages:
 > Prevent corrode the radiator and other parts, resulting in coolant leakage and serious engine damage

Regular coolant replacement is therefore important!

PIT SERVICE Wheel Alignment

Recommended interval
 Every 4 new sets of tyres change

From \$80
 45mins

Advantages:
 Correct wheel alignment is important for suspension tuning
 Our state-of-art equipment that can measure and adjust your cars alignment quickly and precisely so the suspension system can give its best performance

PIT SERVICE Air Con Recycle

Recommended interval
 Every 20,000km

From \$100
 30mins

Advantages:
 > Full charge gas and compressor oil removes particles and longer compressor life .
 prevent tube and compressor blockage and compressor oil not enough causing compressor damage .

PIT SERVICE Power Steering Fluid Replacement

Recommended interval
 Every 30,000km

\$40
 20mins

Advantages:
 > Power steering fluid plays a important part in your car's steering. When the steering wheel starts feeling a little heavy, it's time to replace the fluid

PIT SERVICE Brake Fluid Replacement

Recommended interval
 Every 30,000km

\$30
 LABOUR CHARGE

Advantages:
 Brake fluid gradually loses its performance as it's degraded by heat and moisture. Depending on driving conditions, air bubbles can form in the fluid, reducing braking performance. (This is known as "Vapour lock")
 Regular fluid replacement is very important.

PIT SERVICE Tyre Rotation & Balancing

Recommended interval
 Every 10,000km

\$30
 30mins

Advantages:
 > The reason we rotate tyre is to even out the wear and properly done, all the tires will be worn out at the same time.

PIT SERVICE Throttle Body Clean

Recommended interval
 Every 30,000km

\$68
 30mins

Advantages:
 > Reduce harmful emissions, helpful with mot emission failures, restores lost engine performance and deficiency.

PIT SERVICE Nitrogen Gas Package

Recommended interval
 Topping up every

\$35
 20mins

Advantages:
 > Better fuel mileage . Prolongs tyre life span up to 25% . Reduces ture temperature . Improves road holding and safety driving.
 (Package provide 4 times topping up)

PIT SERVICE Pre-Car Inspection Service

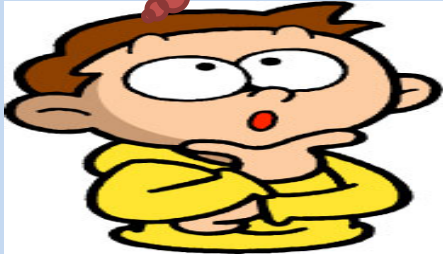

Recommended interval
 Every 40,000km

From \$38
 45mins

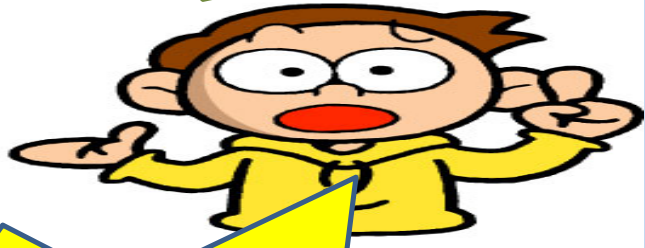

Advantages:
 > 50 points check
 Topping up if necessary (brake fluid , coolant , battery water , power steering fluid etc...)
 Exclusive replacement part.
 Regular checks can prevent the severity of the damage.
